

# FLUIDITI ATM SECURITY

The Fluidity ATM Security product provides ink staining protection for NCR ATMs, against ram raids, cutting and forcing attacks, while the ATM safe door is closed. The key benefit of the system is that it requires no additional keys or codes to deactivate the security system, but is automatically deactivated when the safe door is legally opened.

- Available as a factory feature on new ATMs or as an upgrade
- Proven reliability
- Easy to use
- Upgradable
- Cost effective

# FLUIDITI ATM SECURITY

The NCR FLUIDITI ATM Security is an ATM based system designed to protect cash while the ATM is in operation.

Sensors located inside the ATM at potential attack points are connected to the injection system control board. The sensors can detect attack by ram raid, explosion, penetration or door forcing.

## SPECIFICATIONS

	Battery backup	Life time
Fluiditi ATM Security	48 hours	5 years (ink and battery)

## SECURITY FEATURES

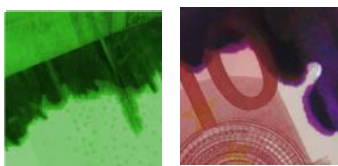

- Intelligent Banknote Neutralisation System (IBNS)
- Ram raid detection
- Forced entry detection
- Tamper proof = no unauthorized entry possible
