

CC6000

CC 6000 is the most modern and technology-advanced transport box for CIT applications. The technology used in the CC 6000 is the fruit of years of research combined with years of experience in the field of security, coupled with know-how and highest neutralization performance criteria.

Its design makes it the perfect box for Cross-Pavement protection with the lowest Total Cost of Ownership (TCO), approved by major CIT companies worldwide.

- Lightweight & Ergonomic
- Highly Secure & Up-to-date technology
- Ready to use & Simple to maintain
- Cost effective & Scalable

CC6000

The CC 6000 offers an exceptional flexibility in managing different applications and processes with remote access capabilities. The CC 6000 has been designed to eliminate pavement risk by CIT with armoured cars for the protection of both valuables and staff during transport.

SPECIFICATIONS

Capacity (banknotes)	Outside Measurements (mm)	Inner Measurements (mm)	Weight (unloaded)	Battery autonomy
up to 6,000	H414 x L465 x D203mm	H327 x L345 x D115mm	10 kg	1 year
